Get -- n.edinfr,~ AP Biology Reading Guide Fred and Theresa Holtzclaw Chapter 43: The Immune System Name Period. Chapter 43: The Immune System. Our students consider this chapter to be a particularly challenging and important one. Expect to work your way slowly through the first three concepts.43. Explain why two normal embryos result when the two blastomeres on the left, but not those on the right, are separated. ! Blastomeres that received half or all of the material in the gray crescent developed into normal embryos, but a blastomere that received none of the gray crescent gave rise to an abnormal embryo without dorsal structures. 44.AP Biology Reading Guide Julia Keller 12d Fred and Theresa Holtzclaw Chapter 45: Hormones and the Endocrine System 1. What is a hormone? In animals, hormones are secreted into the extracellular fluid, circulate in the hemolymph or blood, and communicate regulatory messages throughout the body.25. One of the early problems in immunology was trying to understand how an organism with a limited number of genes (for humans, about 20,500) could produce a million different B-cell
