Susan Lacke went 8 weeks as a paleo vegetarian -- here's how she made it work (and lost 19 pounds in the process).[...] are another classic breakfast favorite, and turnips play the role well. I have blogged about my turnip hashbrowns before. The biscuits and sausage gravy are a ...The chuck or “shoulder” area of the bovine is a tougher piece of meat. There’s no getting around that. Chuck roasts and steaks come from a part of the animal that is used excessively.Much of the low carb and paleo reasoning revolves around insulin. To quote one random blogger, “Carbohydrates increase insulin, the root of all evil when it comes to dieting and health.” So because carbs increase insulin, we should stick mostly to meat, which is fat and protein—no carbs, so no increase in insulin, right?
